Class Diagram – Online Food Delivery System

A **Class Diagram** is a UML diagram that shows the **structure of a system**. It represents the main classes of the system, their **attributes (data)**, **methods (functions)**, and the relationships between different classes.

For the **Online Food Delivery System**, the class diagram can contain the following main classes:

Main Classes

1. **Customer** – stores customer details and handles activities like login and placing orders.
2. **Restaurant** – stores restaurant details and manages food items and orders.
3. **FoodItem** – contains information about food such as name, price, and availability.
4. **Order** – stores details of a customer's order.
5. **OrderItem** – represents individual food items included in an order.
6. **Payment** – manages payment information and payment status.
7. **DeliveryPartner** – handles delivery-related information.
8. **Admin** – manages users, restaurants, and orders.

Customer
+customerId: int
+name: String
+email: String
+phone : String
+address: String
+register()
+login()
+browseFood()
+placeOrder()
+cancelOrder()
+viewOrder()
Restaurant
+restaurantId: int
+name: String
+address: String
+phone: String
+rating: float
+addFoodItem()
+updateFoodItem()
+removeFoodItem()
+acceptOrder()
+rejectOrder()
FoodItem
+foodId: int
+name: String
+price: double
+category: String
+availability: boolean
+addFood()
+updateFood()
+removeFood()
+checkAvailability()
Order
+orderID: int
+orderDate: Date
+status: String
+totalAmount: double
+deliveryAddress: String
+createOrder()
+calculateTotal()
+updateStatus()
+cancelOrder()
+viewOrderDetails()
Payment
+paymentId: int
+paymentDate: Date
+amount: double
+paymentMethod: String
+paymentStatus: String
+makePayment()
+processPayment()
+refundPayment()
+checkPaymentStatus()
Admin
+adminId: int
+name: String
+email: String
+password: String
+login()
+addRestaurant()
+removeRestaurant()
+manageCustomer()
+manageDeliveryPartner()
+generateReport()
DeliveryPartner
+partnerId: int
+name: String
+phone: String
+vehicleNumber: String
+availability: boolean
+acceptDelivery()
+pickUpOrder()
+deliverOrder()
+updateAvailability()
OrderItem
+orderItemId: int
+quantity: int
+price: double
+subtotal: double
+calculateSubtotal()
+updateQuantity()
